

# CHEMISTRY AND GEOLOGY DEPARTMENT

---

Chair: Michael Cross

Phone: (435) 283-7537

Email: michael.cross@snow.edu

Department Webpage: <https://www.snow.edu/chemistry>

This department includes two major programs.

Geology is the perfect field for people who love the natural world. If you like math and science and you love to spend time outdoors, a degree in geology is a great option for you. Geologists are in high demand to work in energy, mineral, water, and environmental fields.

Chemistry is the study of matter and its changes. Chemistry is a very broad discipline that is considered essential training for engineers, physicians, pharmacists, dentists, nurses, and science teachers as well as for all those pursuing any program in life or physical science. Chemistry broadly includes the study of inorganic, organic, and biologically important compounds as well as the physical and analytical characterization of these materials. Snow College has had excellent success providing exceptional preparation for those desiring to continue in chemistry, chemical engineering, pharmacy, and other premedical and science programs. The Chemistry Department offers general education courses to teach basic principles of scientific thought as it applies to matter and its properties and transformations. General Education students also are able to engage in laboratory experiences. Laboratories are an integral part of chemistry studies at Snow College and provide hands-on experience with the concepts discussed in classes.

## Department Degrees

- Chemistry, Associate of Science (<https://snow-next.courseleaf.com/programs/chemistry-as/>)
- Geology, Associate of Science (<https://snow-next.courseleaf.com/programs/geology-as/>)
- Remote Aircraft Business, Certificate (<https://snow-next.courseleaf.com/programs/remote-aircraft-business-cer/>)
